

GLOBAL INNOVATION,
LOCAL IMPACT

About Us

Established in 2016, MEMKO Systems India is the international base of MEMKO Pty Ltd, headquartered in Melbourne, Australia. Based in Bangalore, we are uniquely positioned to support the evolving needs of Indian industries by delivering both **the tools and the engineering expertise required for world-class innovation and digital transformation.**

We are leaders in digital engineering, with specialised expertise in Model-Based Systems Engineering (MBSE), Product Lifecycle Management (PLM), composites and advanced manufacturing. Our capabilities in additive manufacturing are tailored for highly regulated industries, particularly aerospace and defence, where we actively support engineering and product development for next-generation platforms. We've delivered scalable PLM solutions to major Aerospace & Defence and CPG organisations, driving efficiency and innovation. As a rising leader in the **R&D and innovation ecosystem**, our team brings the technology and experience needed to deliver project success.

MEMKO Systems India is a trusted partner of **Dassault Systèmes, Vericut, CGTech** and **Visure**, we bring globally recognised technologies to drive progress across aerospace, automotive, industrial equipment, and other complex sectors. Building on our success in Australia, we proudly offer India a comprehensive suite of services including **CAD/CAM solutions, 3DEXPERIENCE platform consulting and implementation, PLM, corporate training & certification, data migration & system integration, and custom software development.**

We also serve the aviation sector with NIFTI™, a MEMKO-developed Non-Intrusive Flight Test Instrumentation system that enables fast, flexible and wireless data collection for flight testing.

Partners

Clients

Solutions & Services

CAD/CAM & PLM Solutions

Delivering end-to-end engineering workflows with world-class tools from Dassault Systèmes, Vericut, ICAM and Visure

PLM Services

3DEXPERIENCE PLM Implementation, upgrade, migration, integration & customisation

Digital Engineering Leadership

Specialising in MBSE, composites and advanced manufacturing - enabling precision engineering in aerospace, automotive and beyond

Additive Manufacturing

Tailored engineering solutions for complex, regulated sectors - with a focus on aerospace, defence and advanced manufacturing industries

Industry/Corporate Training

Customised and tailored training programs on CATIA V5, 3DEXPERIENCE CATIA, DELMIA, ENVOIA and industry-based best engineering practices

Flight Test Instrumentation

Powered by NIFTI™, MEMKO's proprietary non-intrusive, wireless flight data system
